

THE ODOR RANGER

ONE OF NWC'S SPECTRUM OF ODOR CONTROL PRODUCTS

Our Mission: Seek & Destroy Odor Causing Bacteria

New Waste Concepts brings you an odor destroying, ready to use product designed to eliminate, not mask, objectionable odors in institutional and industrial settings.

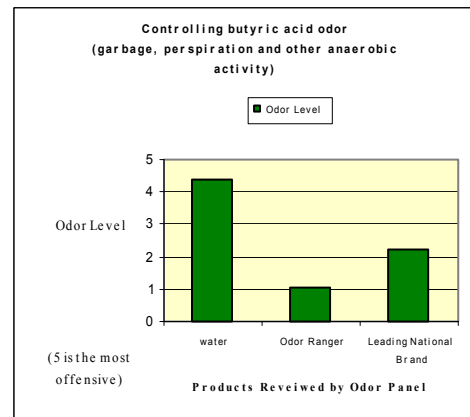

The Odor Ranger combines the fast action of chemistry with the long term benefits of microbes. **The Odor Ranger** captures and destroys odors by first, instantly binding the odor causing molecules, then through the use of a proprietary microbial team, devour the bound odor molecules.

The Odor Ranger is the result of intensive research and development to produce a odor controller and cleaner that goes well beyond the capability of other products on the market

To prevent the return of the odor, specialized microbes convert the odor-causing organics to benign cellular components plus odorless carbon dioxide and water. This combined chemical and microbial effect makes the **Odor Ranger** a powerful, yet safe and environmentally friendly odor controller.

The Odor Ranger is designed to provide optimum odor reduction and organic removal in the following multiple applications:

- Garbage bins and collection areas
- Bathrooms
- Litter boxes and pet areas
- Loading docks
- Garage and basements
- Fitness facilities

Odor Ranger effectively controls all major classes of malodorous compounds

COMPOUND	TYPE	REDUCTION VS CONTROL
Hydrogen Sulfides	Sulfides	92%
Ammonia	Ammonia	46%
Dimethylamine	Amine	46%
Trimethylamine	amine	49%
