

ProGuard SB2

Lowest Cost ADC on the Market Less then a \$0.01 per Sq. Foot

☆ ConCover 180 ☆ ConCover SW ☆ ProGuard SB ☆ ProGuard IIB ☆ ProGuard IIB+ ☆ SuperSeal 40 ☆ SuperPlus SW ☆

INTRODUCING THE ALL NEW PROGUARD SB2

The ProGuard SB2 product is the latest in a line of covers from the Company that brought you the first ADC on the market in 1987. The ProGuard line of ADC's were developed specifically to save landfills money as a way to lower their cost for short term/overnight covers. ProGuard SB2 takes it a step further and reduces your cost to unheard of levels.

DAYS

Look at all the benefits

- Significantly Lowers Cost
- Works in any machine/pump type
- Paper is sourced locally for reduced shipping costs
- Retains the Quality that ConCover/ProGuard are known for
- Easy to Mix, Easy to Clean, Easy to Load
- Lowest Batch Cost and Lowest Cost per Sq. Ft.

How We Did it

Over the past few years, NWC has been tracking trends in raw material costs, fuel cost, and the operational changes going on in the solid waste industry. Monitoring these trends and our unique understanding of the driving forces that are helping landfill managers make smart decisions was/is critical in developing the right product.

We reformulated using raw materials whose costs have not trended upwards over the past 10 years. For example the price for cement has trended upward due to the increase in demand by the Chinese. The demand from the Oil and Gas industry have driven the prices up of some of the materials that are commonly used in some of the more popular ADC's. Our formula avoids these increases and we pass that saving on to you

We reduce your shipping cost by sourcing the bulk of your Raw materials locally. A large percentage of ADC's consists of a Mulch base paper product. We have partnered with Paper Companies across North America so we can find a local source.. which significantly reduces your shipping costs.

And Finally we made it so you can use it in any Hydroseeding Machine and Pump.. Use your current equipment

All this with the quality that the ConCover/ProGuard brand is known for means savings of up to 40% . But don't take our word for it Call now and order a Trial Package and we will take 50% off the Shipping.

FEATURES & BENEFITS

Thick viscous material that will not fall off your hand when inverted

- Adheres to plastic and other difficult to bond substrates
- Will adhere to vertical surfaces and waste in the landfill
- Creates thick vapor suppressing layer to minimize escape of odor carried by moisture evaporation
- Safe - Sprayed particle size of droplet too large to inhale
- Does not wash off easily due to quality of polymers used
- Visually provides an excellent looking cover material

Can be left in the mixing tank for over five days

- Reduces labor since tank does not need daily reloading
- Eliminates waste -competitive products require use of entire tank before hardening which could jam gear pumps
- Allows mixing a load whenever your application team has time
- Crews leave on time creating better morale, with less mixing and application at the end of the day
- No need to shut landfill due to high winds and blowing paper. Product can be sprayed on demand; blowing litter can be controlled with a light application.
