DESTROY ODORS

The SWAT TF-1000 was designed to deliver odor, dust, flies & bird control for long, unsupervised periods of time. The Tangential Fan System's unique ability to push the small droplet size water particles through revolving rotary head misting baskets, drives

NEW WASTE CONCEPTS
Brigade of Odor battling products as high as 200 ft. into the air and, with the fans aimed sideways, it enables coverage for over 400ft of your working face. The SWAT TF1000 also has the ability to hold two separate chemical products that can be used for multiple purposes, and has a fuel capacity for up to 10hrs of continuous operation.

SWAT TF TECHNOLOGY (Tangential Fan)

Tangential Fan technology is one of the most efficient generators of wind power. The blade surface areas are significantly larger than a standard radial fan, which is more like the efficiency of the small numerous blades found in a jet engine over a propeller driven aircraft. This technology accounts for the ability to push the mist created by the rotary head misting baskets as far as 200 ft. (35 meters). This is Critical when trying to cover large areas.

SWAT TF SERIES CONFIGURATIONS

1000 GALLON TANK (Standard Two Fan Unit)

- Single 10 gallon product dispensing Tank
- Dosatron chemical metering
- Magnetic flow meter
- 33 hp engine – Kubota
- Manual wing movement operation
- Electric horizontal to vertical air flow actuator
- Low water auto shut off for water tank
- Low chemical sensor for chemical tank

OPTIONS

- Three Fan unit (requires larger motor 66 hp John Deere)
- 34 gallon hydraulic pump
- Hydraulic actuators for Fan wing movement and vertical to horizontal air flow actuators
- Twin chemical tanks
- Topical spray centrifugal pump, hose reel and 50 ft. Hose (manual hose reel - TM)
- Topical Spray centrifugal pump, electric hose reel and 100 ft. hose (EL system)
- Spray cannon platform
- Elimination of chemical tanks and metering system

• 300 GALLON TANK (Standard Two Fan Unit)

- Single chemical tank – 5 gallon
- 23 hp engine – Kubota
- Electric horizontal to vertical air flow actuator
- Low water auto shut off for water tank
- Mounted on single axle trailer

OPTIONS

- Electric motor drive
- Eliminate chemical tank
- Eliminate water tank
