

SWAT TF-500

"A Mobile Misting Platform Built for the 21st Century"

☆ Odor Ranger ☆ Odor Sergeant ☆ Odor Master Sergeant ☆ Odor Corporal ☆ Odor Captain ☆ Odor Major ☆ Odor Lieutenant ☆ Odor Colonel ☆

DESTROY ODORS - ELIMINATES DUST - DRIVES BIRDS AWAY

The SWAT TF-500 was designed to deliver odor, dust, Insect & bird control for long, unsupervised periods of time. The Tangential Fan System's unique ability to push the small droplet size water particles through revolving rotary head misting baskets, drives Odor Control Products as high as 200 ft. into the air.

MOBILITY

The SWAT TF-500 is a completely self sufficient Mobile platform that enables you to deliver odor control precisely where you want it. Move it based on wind conditions, Traffic patterns, locations of problems spots, etc.. Topical applications or misting applications, the SWAT System can handle your bird, odor or dust problem.

SWAT TF TECHNOLOGY (Tangential Fan)

Tangential Fan technology is one of the most efficient generators of wind power. The blade surface areas are significantly larger than a standard radial fan. The appropriate analogy is more like comparing the efficiency of the small but numerous blades found in a jet engine, over the power of a propeller driven aircraft.

The revolving rotary head misting baskets can be changed based on the size of the droplet you wish to produce. Finer baskets deliver a smaller finer mist (18-20 microns) while bigger baskets produce larger droplet sizes (25-50 microns). The baskets are largely maintenance free especially when compared with Fixed Nozzle Systems that often clog.

SWAT LEASE PROGRAM

PRODUCT INCLUDED (A set number of Gallons per Month)

Having a Machine that can deliver a Odor control product to the problem area quickly and efficiently is only half the battle. Having high quality Odor Control products is just as important. New Waste Concepts is the creator of processes that work, which is why we have the **'ProbSol' Lease Program**. Each of its leases includes not only the equipment but also a fixed amount of product for **'FREE'** each month. We have one of the most robust lines of Odor control products in the business and you can pick and choose the product you need without taxing your wallet, because nearly all products are priced exactly the same. Anything over and above your Monthly stipend will be billed at our contract pricing level. Include a Service Plan if you wish!! We can even handle servicing your machine for you..Talk to one of our Experts to find out more!!

SWAT TF 500 STANDARD CONFIGURATION

500 GALLON TANK (Standard One Fan Unit)

- Single 10 gallon product measurement/dispensing Tank
- Dosatron chemical metering
- Meter (optional)
- 20 hp engine – Honda Engine (gas)
- Manual horizontal to vertical air flow actuator
- Low water auto shut off for water tank
- 75' collapsible hose & reel with 3 nozzles
- Standard towable trailer hitch
